ABOUT ME

Over the past **5+** years I have gained experience in both **front-end** and **back-end** development. As a self-taught programmer, I am self-motivated and passionate about software development.

I have successfully deployed multiple mobile applications on the App Store and Play Store from scratch, overcoming strict requirements and compliance challenges. Additionally, I have developed responsive websites to make it fast, smooth, and easy to use, always ensuring that I follow coding standards and best practices.

I transitioned to iOS development, where I continue to leverage my skills and experience to create high-quality mobile applications. This new role has allowed me to further specialize and contribute to innovative projects.

WORK EXPERIENCE

NEODAY
iOS Developer

Jun 2023 - Present

- Unit testing to ensure high-quality, bug-free code.
- Collaborated with cross-functional teams, including designers and product managers, to deliver high-quality products.
- Implemented new features for NeoDay's SDK, ensuring seamless integration for clients with the platform.
- Automated development, testing, and release processes using Fastlane.
